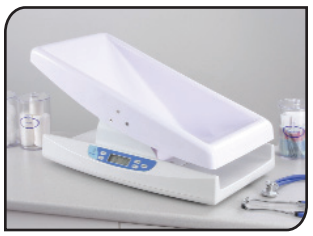
DS4200 Infant Scale



The Model DS4200 features a molded plastic infant seat. For maximum infant safety, the seat is permently mounted to the scale. The seat can be adjusted to face either right or left so that it can allow easy access to the infant chair in any office configuration. With 0.2 oz (5 g) accuracy, medical staff will now be able to accurately track even the smallest weight changes. The weight is quickly locked-on and displayed with the Weight Lock technology. A beep signals the weight has been locked-on allowing attention to be focused on the patient, rather than the weight display. The reweigh feature allows the infant to be weighed again without removing the baby from the scale. Pressing the KG or LB buttons quickly changes weight units between pounds:ounces and kilograms. 45 lb maximum capacity. Four AA batteries (included). Two year battery life. Three year warranty.

DS5100 Physician Scale

With the DS5100's Touchless Start feature, you can acquire a patient's weight in as little as two seconds without any buttons to press. The large platform accommodates patients weighing up to 500 pounds. The exclusive Weight Lock feature allows an accurate weight to be held regardless of a patient's motion. The DS5100 works on any flooring, including carpeting. The sturdy aluminum column houses the height measurement rod. Simply extend the measurement arm and pull upwards for adult heights or push down to measure a child's height. To calculate BMI, enter the height using the scroll buttons, press the BMI button and the patient's Body Mass Index is instantly displayed in the right-hand LCD. 500 lb. maximum capacity. BMI Calculator. Six AA Batteries (included). Three-year battery life. Three-year warranty.

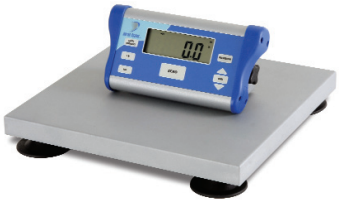
DS6100 Portable Scale



Features a large, stable, low-profile platform that works on any flooring including carpeting. The Touchless Start feature acquires a patient's weight in as little as two seconds without any buttons to press. The Weight Lock feature allows an accurate weight to be held regardless of a patient's motion. The Reweigh feature allows a second weight to be acquired while the patient remains on the platform. Optional USB and RS-232 communications options allow the recoding of a patient's weight and BMI value into a PC based Excel spreadsheet with the Excelerator software. Patient data can also be sent to an optional printer or EMR system. 500 lb maximum capacity. BMI Calculator. Six AA batteries (included). Two-year battery life. Three-year warranty.
